One Laboratory, Many Ways To Present

A Familiar Identity

Lab, team, and partner branding stay together.

- A historical cover, with modern Typst authoring.
- Linked author affiliations and email addresses.
- Readable headers and measured footer fields.

Your Own Preferences

Choose a flavor, a palette, and a navigator independently.

The same content can serve a seminar, a lecture, or a project meeting.

Color Without Rewriting Content

The Colors In This Presentation

background #ffffff	surface #ffffff	surface-alt #efe7ee	primary #631058	foreground #000000
muted #424242	info #206a9f	success #23764c	warning #8b5c00	danger #bd3450

Navigation That Knows The Structure

The tree strips above show the talk title and its current ancestors. The slide title keeps its own row.

> **Try It Live**
> Change `navigation` near the top of this file to `"dots"`, `"context"`, `"panes"`, `"sidebar"`, or `none` and preview the same presentation.

The small footer controls link between logical slides. Animation frames share one navigation step.

Explain The Main Idea Outline

A Shared Visual Identity 3
Explain The Main Idea 7
Containers With A Common Language 8
Reveal A Nested Argument 9
Give Secondary Information Less Weight 10
Show Evidence And Methods 11

Containers With A Common Language

Observation

A clear claim deserves a visible home.

Reproducible

Evidence

Keep the result and its explanation together.

Qualification

Show the conditions under which the claim holds.

Next Question

What would make the evidence stronger?

Reveal A Nested Argument

Start With A Claim

State the main observation in one sentence.

Reveal A Nested Argument

Start With A Claim

State the main observation in one sentence.

Add The Supporting Reason

Explain the evidence, then make the limitation visible.

Reveal A Nested Argument

Start With A Claim

State the main observation in one sentence.

Add The Supporting Reason

Explain the evidence, then make the limitation visible.

Check The Assumptions

Give Secondary Information Less Weight

An important phrase should remain easy to locate.

Secondary context inherits the current font and size.

A brief aside can be quieter without turning unreadable.

> Give the audience one clear idea to carry into the next slide.
>
> — A Presentation Design Note

Make The Central Idea Easy To Remember.

Show Evidence And Methods Outline

Explain The Main Idea 7
Show Evidence And Methods 11
Comparable Evidence At A Glance 12
Code Remains Native Typst Content 13
Citation Identities Stay Consistent 14
Plan The Next Steps 15

Comparable Evidence At A Glance

Figure 1: Illustrative scores on the same scale.

Table 1: A synthetic comparison.

Method	Score
Baseline	0.54
Variant	0.72
Proposed	0.88

Illustrative data; no empirical claim is intended.

Code Remains Native Typst Content

```python
from statistics import mean

def summarize(scores):
    return {"count": len(scores), "mean": mean(scores)}
```

Keep It Readable
Preserve language highlighting and explain what the audience should notice.

Citation Identities Stay Consistent

A normal reference [Knuth1984a] and a footnote citation [Knuth1984a] share their compact identity with the bibliography.

A second publication by the same author and year [Knuth1984b] receives its own disambiguation suffix.

Author–year labels identify sources across slides even when footnote counters restart.

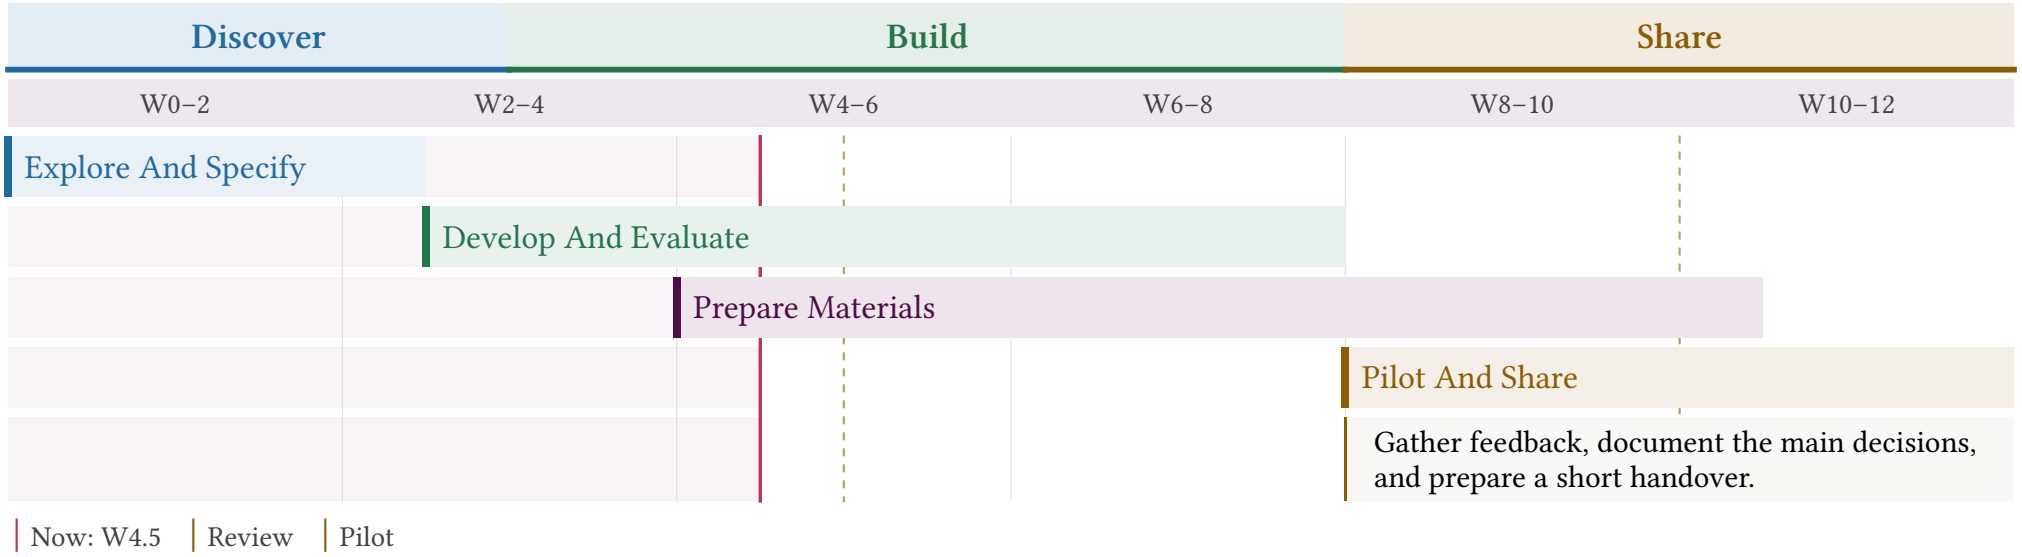

[Knuth1984a] Knuth, D. E. (1984a). *The TeXbook*. Addison-Wesley.

[Knuth1984b] Knuth, D. E. (1984b). Literate Programming. *The Computer Journal*, *27*(2), 97–111. https://doi.org/10.1093/comjnl/27.2.97

Let's Discuss

- Keep the main claim visible.
- Connect it to comparable evidence.
- Make the next step easy to find.

Supporting Material Outline

Supporting Material i
An Explicit Supporting Detail ii
Materials And Links iii

An Explicit Supporting Detail

Appendix slides remain visible while the main slide total stays fixed.

Extra Context

Reserve detail for questions without overloading the main argument.
